

LAMINATE SHELVING //

BRIDGE BLU

LAMINATE SHELVING DESIGNED TO LAST

Blueridge is a laminate shelving collection that has been designed to last in high-use areas. The construction features a 1" thick core with high pressure laminate on both sides and a 3mm PVC edge, and brass inserts for the strongest possible connection points. We don't use TFL and we don't use 3/4" cores. Our shelves actually support the weight of books, and it carries our 20 year warranty.

CASCADING CONTOURS

The Blueridge standard offering includes straight, inner curve and outer curve shapes to fit any kind of flow and design your space requires.

COLOR YOUR WORLD

The laminate construction of Blueridge provides a wide array of color and pattern options to fit any look your space needs.

Blueridge was designed to work in perfect conjunction with other LIAT collections, including Lenoir lounge & Nash tables.
